AEAM Liability Matching 30Y Receiver Fund

Factsheet as of 31 July 2024

Fund objective

The Fund's objective is to generate 30-years interest rate risk exposure that can be used to hedge interest rate risk attributable to 30-years key rate in an efficient manner as part of the fixed income portfolio. The Fund uses e.g. interest rate swaps to increase the duration. As a result of the increased duration the Fund has a leveraged exposure so that the volatility of the Unit value is higher than that of an average fixed income fund. The Fund uses a buffer to meet collateral requirements imposed by the central clearing houses. In order to meet collateral requirements at all times, in events of strong market movements additional payments (capital calls) or pay-outs (capital redemptions) take place from or to the other components of the participant's investment portfolio.
